Weighting:

Please correct any imbalances in your data by weighting before sending it, so that you provide a representative sample of the population (or a representative sample of the stated universe, if this is not a total population sample).

Each individual respondent's weight needs to be written onto <u>columns 37-47</u> of the record. The first 4 <u>columns (37-40)</u> will refer to the *whole number* (including leading zeros). <u>Column 41</u> contains the <u>decimal</u>. Finally <u>columns 42-47</u> must contain the <u>decimal places</u> (including zeros).
